## LATVIAN INDUSTRY AND AGRICULTURE SAVE FUEL

FACTORIES SAVE ALMOST 500 TONS -- Sovetskaya Latviya, 25 Nov 49

A competition to save electric power is in full swing at the Lenta factory. All machines are being checked and repaired, and care is taken to see that lights are not left on during nonworking hours. As a result, the factory saves over 5 percent of electric power per month.

Other light industry plants of Latvia are also saving considerable amounts of power and fuel. During the third quarter of 1949, nearly 500 tons of fuel were saved.

MTS MAKE CONTRIBUTION -- Sovetskaya Latviya, 16 Nov 49

Tractor operators of MTS have been successful in saving a large amount of fuel and lubricating materials. Since the beginning of 1949, 33,000 kilograms of fuel have been saved. This represents enough fuel to permit the KhTZ-NATI tractor to plow about 1,300 hectares. Tractor operators were also successful in saving over 65,000 rubles in repair work.
